.NET Developer having over 2+ years of extensive experience in complete software development life cycle (SDLC) involving Requirements Gathering, Analysis, Design, Development, Testing, Packaging, Deploying and Supporting of Windows Applications, Web Applications. Experience in MVC, Three-tier architecture, Agile Methodology for full lifecycle of the project.

EXPERIENCE

May-2019. [.NET DEVELOPER - KEYCONCEPTS - SURAT,](#)

- Present

Project Name : DMS (Distribution management system).
A Distribution Management System (DMS) is a collection of applications designed to monitor & control the entire distribution network efficiently and reliably. ... DMS access real-time data and provide all information on a single console at the control centre in an integrated manner.
(Other project listed in under Skills)

Major accomplishments :

- Creating .Net Core WEB APIs.
- Involved in various phases of the development life cycle by gathering requirements, analysing, design and development. ☑
- Followed Agile methodology with daily scrum meetings and provided user story updates. ☑
Worked on routing to load controller type using Asp.Net MVC for reaching appropriate action in the web application.
- Sometimes as per requirements use MVC razorview engine for reusing the individual user controls by not coupling them with underlying data elements. ☑
- Used Asp.Net MVC framework to support the use of dependency injection to inject objects into a class, instead of relying on the class to create the object itself.
- Created application using HTML5, CSS, J Query, JS and Bootstrap for responsive design.
