Decision making

PROFILE

Experienced Automation and Manual Test Engineer with a strong focus on delivering high-quality software solutions. Skilled in implementing automated and manual testing strategies to detect and resolve defects throughout the software development lifecycle. Proficient in developing and maintaining automated test scripts using industry-leading framework such as Selenium and Appium.

EXPERIENCE

Key Concepts LLP

2022-Present

Software QA tester

- Collaborated with cross-functional teams to understand project requirements, define test objectives, and create comprehensive test plans and test cases.
- Conducted manual testing to ensure the quality and functionality of web and mobile applications.
- Designed and executed test scenarios, tracked defects, and managed defect lifecycle using Trello.
- Implemented and maintained automated test scripts using Selenium WebDriver, resulting in improved efficiency and faster release cycles.
- Developed and executed API test suites using Postman and REST Assured to verify backend functionality and perform data-driven testing.
- Integrated automated tests with Jenkins for continuous integration and participated in setting up CI/CD pipelines.
- Utilized Git and GitHub for version control and collaborated with the development team to resolve issues and ensure code quality.
- Prepared detailed test reports and communicated test results to stakeholders, including project managers and clients.
- Conducted exploratory testing to identify usability issues and provide feedback for user experience improvements.

Vasundhara Infotech LLP

2021-2022

Software Tester

- Conducted manual testing for software applications, ensuring adherence to test plans and test cases.
- Performed requirement analysis to understand project objectives and deliverables.
- Created detailed test plans, test scripts, and test reports to document test activities.
- Identified, documented, and tracked defects using bug tracking tools (e.g., Trello) to ensure their resolution.
- Collaborated with cross-functional teams, including developers and product managers, to communicate test results and assist in defect resolution.
- Participated in agile ceremonies, such as sprint planning, daily stand-ups, and retrospectives, to drive collaboration and improve the testing process.
- Actively contributed to process improvements, suggesting enhancements to testing methodologies and strategies.
